Antoni Commodore

Senior UX/UI Designer & Developer

I design and build digital products used by millions of people, with a focus on design systems, complex workflows, and front-end code. 13+ years working on both sides of the design-to-development handoff.

Design

- Product & UX/UI Design
- Complex Workflow Design
- Interaction Design & IA
- Accessibility (WCAG 2.2)
- Prototyping (Figma)
- Design-to-Code
- Agentic Workflows

Design Systems

- Component Libraries
- Design Tokens & Theming
- System Governance

Front-End

- React & React Native
- Next.js, TypeScript
- HTML/CSS, Sass, Tailwind
- Storybook, Jest, Cypress

Creative Technology

- Three.js & WebGL
- Blender 3D & Rendering
- D3.js Data Visualization

Education

St. Cloud State University
BFA, Graphic Design

Files.com (2025 - present)

Senior UX/UI Designer & Developer

Shaping the user experience across Files.com by identifying areas of friction and designing solutions that make complex workflows easier to understand and use.

- Identify opportunities to simplify complex workflows and improve user experiences across the Files.com platform.
- Led the design and implementation of the Mover and ExpanDrive product experiences, from early concepts to shipped product.
- Collaborate closely with Product and Engineering teams to align user needs with business goals.
- Explore and refine AI-assisted product development workflows using Claude, structured documentation, generated UI, and agent-based systems.

Origin (2024 - 2026)

Senior UX/UI Designer & Developer

Partnering with teams to solve design challenges and improve user experiences, through both design and code.

- Design user experiences, prototypes, and scalable interfaces for client projects.
- Build and evolve design systems and reusable component libraries.
- Collaborate with stakeholders and engineering teams to deliver user-centered solutions.

A2 Odyssey Labs (2024 - present)

Design Technologist

My own studio for building products that combine design, code, and personal interests.

- Build products that blend design, technology, and emerging tools.
- Created F1nsight.com, a Formula 1 analytics and data visualization platform.
- Developed AI-powered and event-focused products including LumTags and Lumetry AI Photo Booth.

Antoni Commodore

Senior UX/UI Designer & Developer

I design and build digital products used by millions of people, with a focus on design systems, complex workflows, and front-end code. 13+ years working on both sides of the design-to-development handoff.

LeagueSpot (2023 - 2024)

Senior UX/UI Designer & Developer

Helped improve the experience for players, coaches, managers, and organizations across the esports ecosystem.

- Designed and built LeagueSpot's design system from the ground up, creating reusable components and patterns that improved consistency across the platform.
- Identified opportunities to simplify workflows and improve the overall user experience.
- Worked across product, design, and engineering to deliver features that balanced business goals with user needs.

GoFundMe (2015 - 2023)

Design System Engineer II

Focused on helping teams build faster and more consistently through scalable design system solutions.

- Helped build and maintain Heart, GoFundMe's internal design system using React, TypeScript, and Sass.
- Created Storybook documentation and supported teams through office hours and design system adoption.
- Partnered with designers and engineers to improve component quality, accessibility, and usability.

Web Developer & Web Developer II

- Built and maintained features across the Home Page, Create Flow, Campaign Page, and Donation Flow.
- Collaborated with product managers and designers to improve key user journeys and increase engagement.
- Supported A/B testing initiatives through Optimizely to validate product decisions and improve conversion rates.

LiveEdit (2013 - 2015)

UX/UI Designer & Developer

Worked directly with clients to design, build, and launch websites for businesses in the health, wellness, and fitness space.

- Designed custom websites tailored to each client's brand and goals.
- Built responsive websites using HTML, CSS, JavaScript, Bootstrap, and the LiveEdit Aurora CMS.
- Facilitated design reviews and feedback sessions with clients throughout the project lifecycle.
- Trained clients on the CMS after launch, empowering them to manage their own content and updates.
